## **ORLANDO UTILITIES COMMISSION IS FEATURED SPEAKER FOR PROLIFICS' FEDERATED IDENTITY MANAGEMENT WEBINAR ON AUGUST 24TH**

**NEW YORK, New York – August 22, 2011** – Prolifics, an end-to-end systems integrator specializing in IBM technologies, today announced that it will host a live webinar on Wednesday, August 24<sup>th</sup> on “The Business Case for Federated Identity Management” and is pleased to have Orlando Utilities Commission (OUC) as guest speaker. Prolifics' reputable IBM dedicated Security Practice has recently attained accreditation and authorization from IBM for its security expertise.

Federated Identity Management (FIM) makes it possible for companies with different technologies to share applications, without needing to adopt the same technologies for directory services, security and authentication. By allowing identities to be shared securely across disparate networks and applications, FIM becomes the glue that enables Single Sign-On to occur to scale.

Prolifics has helped several energy and utilities organizations with their security infrastructures, and is helping OUC to create a secure and enriching experience for the Orlando community, eliminating multiple logins to access different systems such as for bill payment.

This information-rich webinar, led by Prolifics' Security Practice Director, Kyle Watson, will discuss how to establish a cloud-based Single Sign-On solution by leveraging IBM Tivoli Federated Identity Management (TFIM). During the webinar, Lori Townsend, Orlando Utilities Commission's Senior Business Applications Analyst, will discuss the company's key goals and will showcase their Federated Identity Management and Single Sign-On solution.

### **Webinar Details:**

Date: Wednesday, August 24, 2011

Time: 11 AM Eastern

Duration: 1 Hour

Register by visiting: <http://prolifics.com/federated-identity-management.htm>
