 solutions, content and  
 collaborative portals,  
 business intelligence  
 dashboards, data  
 cleansing strategies  
 and security models.  
 We look forward to  
 assisting with your  
 project and can help  
 with governance  
 and application man-  
 agement strategies  
 to ensure a smooth  
 rollout and ongoing  
 maintenance.

## Web Application Health and Security Assessment

**...with Rational AppScan**

### IS YOUR NETWORK SECURE? WHAT ABOUT YOUR WEB APPLICATIONS?

If IT security is your top priority, then you can no longer ignore your Web applications. Leaving them unprotected makes them vulnerable to hacker attacks and other threats. While your network security solutions can help defend your internal systems, vulnerabilities in your Web applications can make those internal systems easily accessible to the public. In fact, they may be the first place a hacker will strike. Make sure you know where your weaknesses are. Assess all of your Web applications.

**SECURITY AND COMPLIANCE  
 SOLUTIONS FOR WEB APPLICATIONS**

### FIND VULNERABILITIES BEFORE THEY BECOME A PROBLEM

While testing Web applications is very necessary, when done manually, it can be time consuming and costly. With the new IBM Rational AppScan Standard Edition, you'll be able to test more applications in less time – and help your organization save money in the process. Once the scan is complete, AppScan will generate a detailed report listing any vulnerabilities found, along with recommendations on how to secure them.

Prolifics, an IBM Business Partner, helps organizations assess and mitigate Web application security risks. With the installation and configuration of IBM Rational AppScan, Prolifics can perform a health check scan of your environment and assess your application vulnerabilities.

### Web Application Health and Security Assessment

This service is typically 1-2 days offsite in which we will:

- ✓ Perform real-time security assessment of selected Web application
- ✓ Analyze the findings of the scan and explain the impact and risks associated with the found issues
- ✓ Provide guidance in the prioritization and remediation steps
- ✓ Deliver summary report outlining findings/ recommendations on areas reviewed
- ✓ Review delivery report

\* Free for qualified customers

### About Prolifics:

Prolifics, in business since 1978, is an end-to-end systems integrator specializing in IBM technologies. A Premier IBM Business Partner, Prolifics has garnered top awards for its customer solutions and its level of technical excellence. Our depth of experience with secure, end-to-end SOA and Portal solutions can help you with all aspects of the full project lifecycle including software procurement, architectural advisement, design, development through deployment, administration and training. With our unparalleled 96% success rate delivering projects on time, on budget, and to specification, let Prolifics be your technology partner.
