**Excellence Award**  
 and 1 of 3  
 WebSphere Service  
 Providers retained by  
 IBM, specializes  
 in SOA and Portal  
 implementations.  
 We look forward to  
 assisting with your  
 SOA project and can  
 help every step of  
 the way to ensure a  
 smooth transition to  
 a proven, secure and  
 flexible WebSphere  
 environment.

## Optimize Your SOA Infrastructure

## Prolifics' DataPower Health Assessment

### IS YOUR ORGANIZATION PROTECTED FROM VULNERABILITIES?

IBM WebSphere DataPower is an easy-to-deploy, high-speed mechanism that ensures the security and acceleration of XML and Web services deployments while extending your Service-Oriented Architecture (SOA). The solution allows your company to adhere to compliance regulations, including Payment Card Industry (PCI) and HIPAA, by offering a central point to provide the security to protect networks and encrypt sensitive data.

Recognized as a leading DataPower expert, Prolifics can help you harness the power of SOA and leverage the value of your existing application, security and networking infrastructure investments. With an increasing dependence on IT infrastructure to perform critical business processes, organizations require high availability and scalability within this environment.

### DataPower Health Assessment:

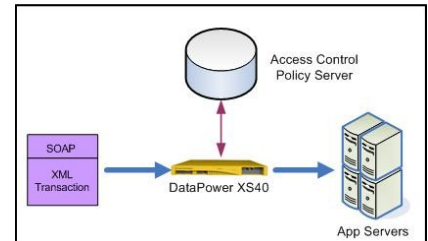

**Prolifics' WebSphere DataPower Health Assessment** provides a comprehensive review of your current DataPower SOA environment. During this engagement, we will assess the stability of the infrastructure and highlight any key areas that should be considered to maintain a healthy architecture and enable future development and growth. We will identify vulnerabilities and bottlenecks, and work to ensure that DataPower is being leveraged to reach optimal security, integration and performance. With a complete assessment of your DataPower infrastructure, we will deliver a report covering the state of your environment, leaving you with:

- An overall summary of the review of your DataPower infrastructure featuring topics such as architecture, high availability, disaster recovery, logging, monitoring, security and governance
- Key findings and recommendations for architectural and interface design suggestions, configuration, logging and monitoring strategies, failover, security and performance enhancements
- Suggested next steps including identifying known problem areas and potential solutions
- Best practices for configuration and development

#### Next Step:

We're offering a dedicated Discovery Call, typically spanning 1-2 days, between you and an IBM-certified Solutions Specialist to understand your current topology and determine the general health of your infrastructure. This no obligation Discovery Call can help you uncover your security, integration and compliance requirements and provide you with insight on how to achieve your business and technical objectives.

\*Free for qualified customers

### About Prolifics:

Prolifics, in business since 1978, is an end-to-end systems integrator specializing in IBM technologies. A Premier IBM Business Partner, Prolifics has garnered top awards for its customer solutions and its level of technical excellence. Our depth of experience with secure, end-to-end SOA and Portal solutions can help you with all aspects of the full project lifecycle including software procurement, architectural advisement, design, development through deployment, administration and training. With our unparalleled 96% success rate delivering projects on time, on budget, and to specification, let Prolifics be your technology partner.
