

Portal Workshops and Development

Prolifics' certified portal Solution Architects, Administrators and Developers are called upon by IBM to conduct large enterprise-scale portal projects! Our seasoned experts will help you install and configure a portal environment, demonstrate valuable portal features, and will translate the breadth of your portal objectives into a step-by-step roadmap to meet your current and future needs.

From Intranets to Extranets to Consumer Portals, organizations are now able to deliver a personalized, tailored and collaborative experience to their employees, suppliers and customers. Prolifics offers the following services to jump start your intranet and customer portal strategy.

All service offerings come with a 2-hour Discovery Session with one of our Senior Portal Architects.

Jump Start Your Portal Initiatives with Prolifics

At Prolifics' **Portal Workshops** you will have the opportunity to learn hands-on from Prolifics' experts and gain insight into portal architecture, administration and implementation strategies. Whether delivering a business-to-business, business-to consumer, or business-to-employee portal, these workshops are specifically designed to provide a hands-on view into topics such as portal development, customization and personalization, portlet deployment, connection to desktop applications including Microsoft Exchange and Office, implementation of high-level search functionality across a portal framework, and security implementation of user access rights and LDAP directory.

Combine our Workshops with **Prolifics Development, Mentoring, and Administration Services** to gain assistance specific to your portal project ranging from setting up a portal team development environment to integrating your company's assets into a portal to building new portlets for new development initiatives.

Portal Developer Workshop Hands-on workshop on portal design and development concepts	2 Days	\$3K
