

for IBM WebSphere development teams

Rational Team Concert

Prolifics — 2009 Winner of IBM's Rational Award for Outstanding Solution, 2008 winner of IBM's Outstanding SOA Solution Award and two-time winner of the Overall Technical Excellence Award — specializes in delivering SOA solutions, content and collaborative portals, business intelligence dashboards, data cleansing strategies and security models. We look forward to assisting with your project and can help with governance and application management strategies to ensure a smooth rollout and ongoing maintenance.

Software development organizations are facing growing pressure to quickly deliver high-quality software that's aligned with constantly evolving business objectives. However, several factors are making this goal more and more difficult to achieve. Projects are becoming more complex while teams are often expected to deliver more applications with the same number or fewer resources. Many teams are geographically dispersed further making collaboration a challenge. And many organizations have difficulty applying consistent processes and standards across disparate projects and groups.

Prolifics WebSphere Customers using IBM Rational Team Concert benefit from a collaborative software delivery environment that empowers project teams to simplify, automate and govern software delivery. Automated data collection and reporting reduces administrative overhead and provides the real-time insight required to effectively govern software projects. Dynamic project provisioning enables day one productivity, while real-time collaboration helps significantly reduce scrap and rework. Rational Team Concert extends the capabilities of the Team with integrated work item management, build capabilities, software configuration management (SCM) and the collaborative infrastructure of the Jazz Team Server. Prolifics provides process templates for Rational Team Concert that are optimized for WebSphere development teams and leverage Prolifics' recommended development methodology, AgileSOA.

Benefits of Rational Team Concert

Enhances team collaboration

Combines a Web 2.0 approach to team collaboration with integrated work item management, continuous build capabilities and software configuration management.

Supports transparent work-item management

Automatically creates and tracks the progress of individual work items in accordance with team process and project rules.

Delivers rich source control management capabilities

Provides essential software version control, workspace management and parallel development support to individuals and teams.

Provides automated process guidance

Provides process automation and guidance features that can help you enforce just enough process to ensure predictable results. And because not all projects or organizations are the same, Rational Team Concert enables you to configure process rules to meet specific project or organizational needs.

Enables more efficient software builds

Save time, money and rework by automating build processes and reducing the possibility of build errors.

Improves visibility with real-time insight into project health

Provides automated data collection and reporting features that give you the real-time insight you need to effectively govern your software projects while reducing time-consuming reporting tasks.

Helps extend your enterprise investments

Easily integrates with other change management applications.

About Prolifics

Prolifics is the largest systems integrator specializing exclusively in IBM technologies, and has garnered multiple awards for technical excellence. Having achieved an unparalleled 96% success rate for delivering projects on-time, on-budget, and to-specification, Prolifics provides expert services including architectural advisement, design, development, and deployment of end-to-end SOA and Portal solutions.
