 Sphere Service Pro-
 viders retained by
 IBM, specializes in
 end-to-end SOA
 and Portal solutions.
 We look forward to
 assisting with your
 project and can help
 every step of the way
 to ensure a smooth
 transition to a
 proven, secure and
 flexible WebSphere
 environment.

Service-Oriented Architecture

Building the Future into your Business

Service-Oriented Architecture (SOA) is the next-generation infrastructure designed for integrating and re-using your existing assets. Within a Service-Oriented Architecture, applications, information and other IT assets are viewed as modular, reusable services or "building blocks" that can be mixed and matched to create new, flexible business processes. IBM WebSphere integration software enables you to develop a reliable and scalable Service-Oriented Architecture by providing industry templates and adapters that will integrate your existing or new 3rd party applications and extend them to partners or suppliers.

Prolifics' certified WebSphere Solution Architects, Administrators and Developers are called upon by IBM to conduct large enterprise-scale SOA projects. Our seasoned experts will help you leverage existing IT resources, introduce new capabilities, and integrate business processes. The result — make your company more agile and responsive to any changing business priorities — pursue new markets, beat the competition, drive down costs and maintain corporate compliance.

PROLIFICS 2-DAY SOA DESIGN WORKSHOP

In this 2-Day SOA Design Workshop, Prolifics will introduce the benefits of a Service Oriented Architecture (SOA) and discuss key design and development concepts for a successful implementation.

Topics include:

- ◆ SOA entry points across the overall maturity model
- ◆ Discussing best practices around industry-popular SOA design patterns
- ◆ Guidance on defining and managing services and techniques for reusing, securing and scaling
- ◆ Assist in mapping high level requirements to SOA architectural components.
- ◆ Recommend web services technologies and usage for SOA implementation
- ◆ Introduction to emerging SOA concepts such as the Service Directory, Service Choreographer and Enterprise Service Bus
- ◆ SOA Governance and best practices
- ◆ Introduction to IBM's SOA reference architecture and product portfolio

During this workshop we will also include a whiteboard session to review your current architecture, products and objectives; and propose an approach toward achieving your SOA Vision.

Special Offer*: \$2000 (valued at \$5000)
** travel and expenses not included*

FREE SOA VISIONING SESSION

Call Prolifics now for a FREE SOA Visioning Session. Customers interested in SOA can benefit from this two hour interactive, executive workshop with a senior level Prolifics Solution Architect to understand next steps towards SOA.

Prolifics specializes in helping you identify the best approach to implementing SOA based on your current environment and overall business and technical requirements; as well as identifying which IBM software products are "best fits" for your specific need. By examining your current business processes, criteria, and your ultimate target, a solid SOA roadmap can be created. Having this roadmap is key to any business practice as it can be used to gain insight into the diverse dynamics of your SOA implementation as well as serve as a gauge to measure and improve upon current business processes. This Visioning Session is the first step toward that roadmap.

SOA Product Focus Areas

- WebSphere Enterprise Service Bus
- WebSphere Partner Gateway
- WebSphere Process Server
- WebSphere Business Modeler
- WebSphere Business Monitor
- WebSphere Integration Developer
- WebSphere DataPower
- WebSphere Transformation Extender
- WebSphere Message Broker
- WebSphere MQ
