ment strategies
to ensure a smooth
rollout and ongoing
maintenance.

Manage Information and Password Security

with IBM Tivoli Access Manager for Enterprise Single Sign-On

Most of our customers tell us that every year it gets harder to manage information security. Users who work with resources from multiple, protected areas juggle many passwords with different key lengths, different content requirements, and varying required update intervals. Forgetting or confusing passwords, failure to update passwords on time, incorrect password guessing can result in system lockouts and loss of productivity while creating a substantial burden for IT help desks. **This can add up to thousands of wasted dollars for a small business or millions of dollars for an organization with 10,000 users.** Left unchecked, these disruptions can grow with a company, eroding productivity and profitability while encouraging unnecessary security vulnerabilities.

IBM Tivoli Access Manager for Enterprise Single Sign-On (TAM ESSO) simplifies access across various applications, ultimately increasing security and reducing costs. With centralized user management, a user is added once and can be subsequently added to a variety of systems automatically. The deprovisioning process is just as easy and reduces a number of security risks. The solution increases user productivity and enables fast access to information by extending the single sign-on functionality to provide workflow automation on shared and personal workstations. Providing secure access, centralized auditing, tracking and reporting, TAM ESSO helps organizations across all industries ensure that they are meeting security and compliance requirements. **Prolifics was the first IBM Business Partner to achieve IBM AAA Accreditation for all Tivoli Security Solutions.**

Take advantage of one of these FREE TAM ESSO offers from Prolifics!

Free Tivoli Access Manager Enterprise Single Sign-On (TAM ESSO) Proof-of-Concept

This proof-of-concept helps to determine the success of TAM ESSO in your organization. A Prolifics Certified Security Architecture Expert will outline your business requirements and demonstrate TAM ESSO features and benefits with your prerequisites. You will receive a report about the proposed solution and its benefits detailing the current environment analysis with respect to logon and password management, user roles and their credential usage patterns for accessing applications.

Free Dedicated Security Architecture Discovery Call

You will be connected with a Prolifics Certified Security Architecture Expert in order to identify your current IT security infrastructure and requirements. At the end of this unique offering, we will provide you with recommendations in order to achieve the best strategy for your needs.

Benefits of TAM ESSO:

- ✓ **Reduce Help Desk costs by up to 90%** by leveraging self-servicing capabilities for password resets
- ✓ **Improve user satisfaction and productivity:** More than 85% reduction in time-to-information by relieving the non-technical end-user burden of remembering all passwords, rules and user IDs while maintaining high security
- ✓ **Reduce audit tracking costs by 75%** by centrally tracking and collating all end-point events, and auditing and reporting for access management
- ✓ **Improve identity assurance by integrating with existing strong authentication technologies** (including USB tokens, physical access badges and biometrics), and by automating password management, application sign-on and sign-off
