## Migrate Vignette to

## IBM Lotus Web Content Management

With the recent acquisition, it might not be a question of "if" but "when" you must transition from Vignette to another Web content management solution. When that time comes, Prolifics, with our experience in migration strategies as well as IBM Lotus Web Content Management (WCM) and Vignette technologies, can help you migrate to your new WCM. Prolifics has a proven methodology which includes analyzing your specific Vignette workflows and seamlessly recreating corresponding workflows in Lotus Web Content Management.

Prolifics also has assets which expedite the migration process from exporting content, transforming the extracted content and then importing into Web Content Management making the process not only efficient, but "pain free." IBM continues to expand its WCM software with a development platform, repository syndication, and task-based workflows. Together with IBM's commitment to delivering world-class portal and collaboration solutions, many organizations are making the transition from Vignette to WCM and to WebSphere Portal overall. In 2008, IBM was ranked by Gartner as #1 in market share for their Web Portal software. By leveraging Prolifics and IBM software, you not only obtain a content solution, but you also gain a completely robust and scalable architecture.

Whether in an advisory role or conducting the entire migration, Prolifics can provide your organization with a team of highly skilled certified consultants who have deep technical knowledge and proven and practical experience. You don't have to re-invent the wheel — leverage Prolifics' knowledgebase of the compatibility and functional differences, as well as best practices around these migration techniques.
