

## WebSphere LifeCycle Services

### As a Premier Level IBM Business Partner,

Prolifics has been selected as one of only three worldwide WebSphere Service Providers retained by IBM. Recognized for excellence in leveraging information technology to deliver e-business solutions, Prolifics is ranked as a Level 5 WebSphere Partner—IBM's highest ranking on its technical expertise scale.

*"Prolifics has developed technical, mentoring, training and recruitment skills that are on par with in-house specialists at IBM,"* Paraic Sweeney, VP of Marketing for IBM's WebSphere Software Platform. *"A level-five rating means you're a master. You can teach and mentor others."*  
(Sm@rtPartner Magazine)

**Prolifics' certified WebSphere Enterprise Developers and System Experts** become fully integrated into your project team to assist with any phase during the lifecycle. Whether managing a project or augmenting your team, we deliver successful, cost-effective enterprise solutions.

- ◆ TIVOLI IDENTITY MANAGER
- ◆ TIVOLI ACCESS MANAGER
- ◆ DB2 & INFORMIX
- ◆ J2EE & JAVA PROGRAMMING
- ◆ WEB SERVICES & SERVICE ORIENTED ARCHITECTURE
- ◆ DISTRIBUTED APPLICATION DEVELOPMENT

## IBM WEBSHERE APPLICATION SERVER FAMILY

### IBM WebSphere Application Server Family

delivers business flexibility and responsiveness as the foundation for an on-demand infrastructure and is the premier transactional application server needed to support mission critical e-business applications. By providing database and back end integration, as well as security and performance capabilities -- such as workload management and clustering, customers deliver enterprise solutions from commerce to self-service to supply chain.

- ◆ **WebSphere Application Server Express** offers an affordable point of entry solution for building and managing simple, yet dynamic, Web sites with an easy-to-use development environment while supporting the full J2EE programming model— including Servlets, JSPs, EJBs and Web services

- ◆ **WebSphere Application Server Network Deployment** provides advanced deployment services that include clustering, edge-of-network services and high availability for distributed configurations and contains a single install image for the Application Server and Deployment Manager, making getting started quicker and easier
- ◆ **WebSphere Extended Deployment** extends the capabilities of the WebSphere platform and delivers a dynamically scalable, easily manageable, high-performance environment for distributed applications. These extended features enable the implementation of a Business Grid — a dynamic, goals-directed, high-performance environment for running mixed application types and workload patterns in WebSphere
